Gazi University, Ankara, Turkey, nispir@gazi.edu.tr

In this talk, we investigate approximation properties of summation-integral type Phillips operators involving Appell polynomials with the help of modulus of continuity. Moreover, we show the rate of convergence for these operators to certain functions by illustrative graphics.

Keywords: Phillips operators, Appell polynomials, degree of approximation.
2010 Mathematics Subject Classification: 41A36, 41A35, 41A30.
